Salonox | Aug 2025 – Dec 2025 - Worked as a Full Stack Developer on real-world production features - Developed and maintained frontend components using React.js - Built REST APIs using Node.js and Express.js - Integrated MongoDB for data storage and optimized queries - Collaborated with team members for feature development, bug fixing, and deployment

Python Backend Developer (Internship)

Aminsofttech Pvt. Ltd. | 6 Months - Worked on an eCommerce web application - Developed backend logic using Python - Implemented login, signup, and logout functionality - Built admin panel features including user and coupon management - Created note management functionality - Used MySQL for database operations - Tools & Technologies: Python, MySQL, HTML, CSS, JavaScript, XAMPP, VS Code, Postman, Jupyter Notebook

Technical Skills

Programming Languages: JavaScript, Python

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Django, Flask

Mobile: Flutter (Basic)

APIs: RESTful API Development, API Integration

Databases: MySQL, MongoDB, MongoDB Atlas (SQL & NoSQL)

Web3: Solidity, Smart Contracts (Basic)

Tools & Platforms: Git, GitHub, VS Code, Postman, XAMPP, Vercel, Jupyter Notebook

Live Projects (Full Stack)

1. Sana Fabrics

<http://sana-fabrics.vercel.app/> - Full Stack business website - Built using React.js, Node.js, and MongoDB - Responsive UI with modern design - Backend APIs for dynamic data handling

2. GigDial

<https://gigdial-frontend.vercel.app/> - MERN stack platform for service-based workflows - React-based frontend with reusable components - Node.js backend with MongoDB integration

3. Baba Perfumes

<https://baba-perfumes.vercel.app/> - E-commerce style full stack application - Product listing, UI interactions, and backend integration - Built with React, Node.js, and MongoDB

4. Shagun

<https://shagun-lac.vercel.app/> - Modern business website - Full stack implementation with clean UI - React frontend and Node.js backend

5. REX Token (Web3 Project)

<http://rextoken.in/> - Web3-based token project - Technologies used: Solidity, React.js, Node.js - Smart contract integration with frontend - Blockchain-based token functionality

Key Strengths

- End-to-end Full Stack Development
 - Live project experience
 - Clean and scalable code practices
 - Strong problem-solving mindset
 - Quick learner and adaptable to new technologies
-
